

SEDALYTE

Replaces more of what is actually lost in sweat. Inadequate electrolyte replacement after sweat loss leads to dehydration, lethargy, reduced water intake and muscle weakness in performance. It is also a major cause of tying up (Equine rhabdomyolysis).

SedaLYTE is an advanced electrolyte replacer specifically designed to help prevent such performance losses from occurring. It has been formulated after extensive research to determine the actual composition of sweat and this research has led to the higher electrolyte levels found in SedaLYTE (Potassium, Sodium, Magnesium and Chloride). This also means that SedaLYTE contains more of what is actually lost in sweat and less of other compounds not important with regards to sweat loss. It is because SedaLYTE's balanced formulation more closely mimics the actual composition of a horse's sweat that it is so effective at helping to prevent poor performance due to sweat loss.

Individual horses sweat differently under differing work loads and climates. SedaLYTE's formulation and feeding directions are directly related to the amount of sweat lost, taking into account both the amount of work done and the climate. This means that you can ensure you are correctly replacing your horses sweat loss no matter what the climate. The addition of glucose in the SedaLYTE formulation improves the uptake of the essential electrolytes into the gut (stomach) to quickly help prevent dehydration.

To also help maximise electrolyte uptake, it is advisable to split the daily SedaLYTE dosage into more than one feed (e.g. half the daily dose in the morning and half in the evening). The apple flavouring in SedaLYTE makes it very palatable.

SedaLYTE contains no bicarbonates and does not contravene the rules of racin

Active Ingredients:

Sodium 217.7gms/kg
Chloride 448.5gms/kg
Glucose 180.3gms/kg
Potassium 124.4gms/kg
Magnesium 16.9gms/kg

Feeding Rates:

30gms for Light Sweaters
60gms for Medium Sweaters.
90gms for Heavy Sweaters.
Split rate - 1/2 morning and 1/2 night.
Can be used as drench 30gm scoop provided

Presentation:

Available in containers of 1kg, 2.5kg, 6kg and 17.5kg

This product is exempt from registration being an oral nutritional compound compliant with Schedule 4 of the ACVM regulations 2001.
