

APPLYTE ORAL REHYDRATION GEL

Description:

Sodium 30.36g/L, Potassium (as potassium chloride), Magnesium 2.93g/L, Chloride 63.96g/L, Sulphate 11.59g/L Phosphate 23.17g, Glucose 260g/L.

Presentation:

Easy to carry 250mL Flip Cap Tube, complete with syringe.

Indications:

For Horses – as an aid in restoring fluid and electrolyte levels depleted by strenuous exercise and sweat loss during training, racing, competition and transport in all horses.

Directions for use:

Always ensure a separate supply of clean, fresh drinking water is available after administration.

APPLYTE is a concentrated solution of body salts, and glucose that is given by oral syringe over the back of the tongue. APPLYTE should promote rapid re-hydration during the 'cooling down' and recovery period following exercise by providing a stimulus to drink. APPLYTE should be administered following exercise, transport or heavy sweat loss.

Dosage and Administration:

Flip tube lid to expose nozzle loading vent. Insert syringe, invert tube and draw desired dose. Administer Applyte Oral Rehydration Gel over the back of the tongue, with immediate access to clean, fresh water provided to drink as required. Dosage rates are for 450-500kg horses. Ponies less than 350kg offer half dose volumes.

Dosage:

Light work (up to 30 minutes duration) - 40mL after exercise (by Oral Syringe over the tongue).
Moderate Work (30-60 minutes duration) - 60mL after exercise (by Oral Syringe over the tongue).
Heavy Work (Racing, jumping, dressage, Polocrosse, Polo, Stock Work) -

80mL after exercise (by Oral Syringe over the tongue).

Heavy Sweat Loss and Dehydration in all horses, Endurance, Eventing -

80mL after exercise (by Oral Syringe over the tongue).

Special Dose Rates:

Severely Dehydrated Horses: 6-8 litres of made-up solution (40mL APPLYTE/litre water) may be administered by stomach tube as required under the supervision of a veterinary surgeon.

Endurance Exercise: 60-80mL can be administered by oral syringe over the tongue, during a ride or at check points, provided water is available or offered immediately.

Travelling Horses, Hot weather or long distances: 40-60mL over tongue with water provided 30-60 minutes before travelling, repeat every 2-3 hours during travelling, and again on arrival as required.

Withholding Period:

Nil

Dispose of empty container by wrapping with paper and placing in garbage.

Store below 30°C (Room Temperature).

Close cap after use. Do not freeze.

This product is exempt from registration being an oral nutritional compound compliant with Schedule 4 of the ACVM regulations 2001.
