

# BV2 – Fumigator

### Description:

Specially formulated to control borer on the wing, fleas, weevils, silverfish, spiders, moths and most other crawling and flying insects.

### Active Ingredients:

4.5g/litre permethrin in the form of a total release aerosol.

8.35g/litre piperonyl butoxide

417 g/litre methylene chloride

Propellant: hydrocarbons.

### Precautions:

#### POISON

Keep out of the reach of children.

Do not allow product to contact food or surfaces on which food is stored or prepared. Wash down all food contact surfaces and utensils thoroughly before reintroducing any foodstuffs.

Avoid breathing vapour. Do not smoke or eat while eating product.

Avoid contact with skin and inhalation of fog.

Dispose of empty container and residue safely.

**Flammable:** Contents are under pressure, do not store or use near heat or flame. Do not puncture or incinerate even when empty.

Keep in a cool place away from heat including the sun.

**FIRST AID:** If fog is inhaled remove to fresh air. Seek medical attention.

### Directions:

Remove all pets from the area to be fumigated. Close windows and doors, block fireplaces, exclude draughts.

Place the aerosol in a firm central position, depress activator ensuring face is well clear of ejecting fluid. Immediately vacate treated area and do not re-enter for three hours. Upon re-entry thoroughly ventilate the area by opening all windows and doors. Do not smoke or use gas/electrical appliances during period of ventilation.

Will control adult borer beetles when beetles are present at the time of treatment during the flight season (September-April). Use alternative control methods for existing population.

For the control of flea, weevils etc use one aerosol per 60 cubic metres.

### Pack:

150ml aerosol

OTC
