

BV2 – Flying Insect Killer- Unperfumed

Description:

Dry formula, low irritant for the control of most flying insects. A dry spray that quickly kills flies, mosquitos and other insects without risk of staining fabrics or walls.

Active Ingredients:

4.5g/litre tetramethrin
0.8g/litre d-phenothrin
1.5g/litre permethrin
in the form of an aerosol.
Propellant: hydrocarbons.

Precautions:

Keep out of the reach of children.
Do not spray towards the face or onto exposed foods or food contact surfaces.
Do not spray on wallpaper or fabrics.
Remove birds. Cover fish tanks before spraying.
Wash food contact surfaces thoroughly before re-introducing edible products.
Ventilate for at least two hours before commencing of processing.
Do not use near air vents and ducts and food stores or processing plants while they are in operation.
Avoid breathing vapour, use with adequate ventilation.
Flammable: Contents are under pressure, do not store or use near heat or flame. Do not puncture or incinerate even when empty.

Directions:

Spray upwards within a sweeping motion for 5 to 6 seconds. Keep windows and doors closed for 15 minutes after spraying. For fast results spray 1 to 2 seconds directly at the insect.

Pack:

500ml spray can

NZFSA Approved Type A (All animal product except dairy).
Agriquality approved for food/beverage/dairy factories category A. No direct contact permitted with dairy products or operational product contact surfaces. May be used on non-operational product contact surfaces and non-operational air/duct/vents provided no residues remain.
