

DOLETHAL solution for injection

***For Animal Treatment Only 250 ml Pentobarbitone sodium 200 mg/L
solution for injection for Euthanasia of dogs and cats.***

Special precautions for use

It may be necessary to increase the dose for older animals weighing more than 10 kg. In case of accidental contact with eyes, irrigate eyes immediately with flowing cold or tepid water.

This product is toxic when orally used.

In case of accidental intoxication: the symptomatic treatment calls for respiratory assistance, forced diuresis and use of bicarbonate solute in order to correct the acidosis induced.

Antidote: as for barbiturates.

Store below 25°C

Any empty packaging or product remainder shall be disposed of according to local government regulations.
