

HUSHER

Elastic Training Aid

The most humane and effective solution for reducing barking, chewing biting and aggression.
Permits panting, drinking and eating.

Fitting:

The point where the neck strap attaches to the black elastic is the **BOTTOM** of The Husher. The top elastic is cut back so it won't ride up on your dog's face.

Your dog may be unusually large or small for its breed. Use a larger or smaller size.

Slide Husher on dog's snout. It must be a snug fit. A Husher that's too small is difficult to get on – use the next larger size. Too large a size won't tire out the muscles, the dog can still bark, etc., so use the next smallest.

Snap collar behind neck, pull strap tight. A tight neck strap does not cause any discomfort. – **PULL IT TIGHT.**

Give corrective command, for example 'NO BARKING'.

Ensure that the dog can pant and drink.

Some dogs resist the The Husher being put on their snout and/or attempt to remove it once it's on. Distract the dog when it shows this behaviour – put The Husher on for two minutes, take it off, put it on again a few minutes later, play with it, take it for a walk – soon the dog will forget that it's there. The Husher is a terrific training aid. You'll find that after a while, you won't need to use it very often – just hang it where he can see it. If you've pulled the strap **VERY** tight and the dog still removes The Husher, wrap the strap around the dog's collar before you snap the buckle.

Hand wash in warm water, hang to dry.

Sizes:

- 00 Chihuahua
- 0 Pomeranian, Yorkie
- 1 Toy Poodle, Pomeranian
- 2 Sheltie, Jack Russell Terrier
- 3 Sheltie, Jack Russell Terrier, Schnauzer
