

IODINE ORAL DROPS

Active Ingredients:

In 1 drop:
Total Iodine (from iodine and potassium iodide) 250mcg
Also contains: purified water.
Potassium content: 47mcg in 1 drop.

Main Indications:

Thyroid function
Thyroid hormone support
Iodine deficiency

Product Features:

Clinicians Iodine Oral Drops (4%) is a dilution of the original Lugol's Iodine solution designed to support healthy thyroid function.

Clinicians Iodine Oral Drops provides a combination of iodine and potassium iodide.

The thyroid gland uses iodine to produce thyroid hormone. Potassium iodide is a mineral source of iodine. Iodine deficiency may account for 96% of cases of low thyroid function. Sufficient iodine levels are critical to proper thyroid function to maintain a successful pregnancy,

A deficiency in thyroid hormone affects the way in which the body utilises energy. It may also affect growth and development; protein synthesis; cholesterol production, carbohydrate absorption; nerve and bone formation; reproduction; speech and mental state and the condition of the hair, skin and nails.

Iodine deficiency continues to be a problem in New Zealand.

Precautions:

Keep out of reach of children.
Store below 25°C.

Product Benefits:

Provides a quality source of supplemental iodine in a form in which the body can use. Liquid solution enhances bioavailability and absorption.

Low toxicity when used correctly.

May be used internally (orally) or topically.

Safe in pregnancy and lactation at the recommended dose.

Presentation:

100ml bottle

OTC
