

## NUTRIGEL

***High-calorie vitamin concentrate for dogs and cats***  
***Highly palatable – energy rich – nutritional support***

### Description:

**Nutrigel** is a high-calorie, mineral/vitaminised dietary supplement for dogs and cats, in the form of a highly palatable paste with protein, fats and carbohydrates.

**Nutrigel** helps provide nutritional support when normal food intake may be lacking over a prolonged period.

**Nutrigel** helps to stimulate appetite while providing calories and other dietary essentials to debilitated or convalescent animals, or those recovering from surgery.

**Nutrigel** is high in calorific value, B group vitamins, folic acid, vitamins A, D, E, calcium, iron, iodine, magnesium and manganese.

The B group vitamins and palatable base help stimulate appetite. The high vitamin A content (3000 iu/10g) makes Nutrigel especially valuable for debilitated cats. Calories are provided by means of soya bean, malt extract, molasses and corn syrup.

Each 100g provides 1500 kilojoules of metabolisable energy.

As a concentrated, easily administered paste, Nutrigel can be useful:

- During inappetence and general debility

- As a general vitamin/mineral supplement
- After oral or bowel surgery
- Where mouth lesions impair food intake
- During feline respiratory disease
- To assist with administering other medication

### Dosage:

10g (approx. 2 x 10cm strips) daily per 5kg bodyweight

### Pack:

Squeeze tubes of 50g and 200g.

This product is exempt from registration being an oral nutritional compound compliant with Schedule 4 of the ACVM regulations 2001.
