

ODOGENE

Odour Control

OdoGene Odour Eliminator/Re-Odouriser

OdoGene Odour Eliminator/Re-Odouriser is based on a powerful blend of essential oils and bactericides. The antibacterial elements work on the micro-organisms responsible for

causing unpleasant smells whilst the essential oils impart a pleasing fragrance to the environment.

OdoGene Odour Eliminator/Re-Odouriser may be used in all human and animal areas where the need for a rapid re-odourisation of the atmosphere with a pleasant fragrance is required.

OdoGene Odour Eliminator/Re-Odouriser is water based and safe to use on all surfaces except polished wood. It is non-toxic, non corrosive, biodegradable and harmless to the environment. It is available in cherry and tropical fruit fragrances and may be used frequently.

OdoGene Odour Eliminator/Re-Odouriser is available in 5 litre concentrate for dilution at 1:50 and in 500ml ready to use trigger sprays, pre-diluted at 1:30.
