

# PINE FRESH NATURAL CAT LITTER

*Highly absorbent wood pellets.*

### Product:

100% natural bark and pine wood, tried and tested by top boarding catteries and breeders.

### Actions:

Pinefresh, through trials, has been shown to provide superior absorption of both wetness and the odour associated with cat urine.

The product is completely biodegradable and once solids have been removed can be used as garden mulch or mixed into compost.

Odour control is attained through the pellets expanding to absorb liquid and smell quickly plus the fresh scent of pinewood.

Pinefresh is also dust free.

### Presentation:

5 kg / 8.5 lt  
10 kg / 17 lt  
20 kg / 34 lt

### Directions for Use:

Pour your PINE FRESH NATURAL CAT LITTER into the litter tray so that it evenly covers the bottom (do not be tempted to make the layer too deep). The depth of the litter will

increase dramatically when the pellets are used and breakdown to their natural state. A LITTLE GOES A LONG WAY!

Between complete changes just remove solid waste and sawdust patches, then add a little more PINE FRESH to the litter tray.

Clean your cats litter tray thoroughly once per week with a good disinfectant such as Trigene and fill again with more PINE FRESH. Your cat will love you for it.
