

WOUND POWDER

A simple and effective ready-to-use fly repelling wound dressing suitable for use on all animals.

Promotes rapid healing with minimal scar tissue formation on all shallow cuts, grazes and scratches.

Description:

Iodoform – A long acting bactericide.
Activated charcoal – To stop bleeding.
Resorcinol – To promote healing.
Camphor – To repel flies.

Features and Benefits:

Activated charcoal stems bleeding
Deodorises and disinfects the wound
Promotes rapid granulation and healing
Non-irritant
Minimises scar tissue formation
Resorcinol has an anti-pruritic effect
Camphor has analgesic and counter irritant properties, and repels flies
Iodoform is antiseptic and slowly releases iodine
Handy low-density plastic puffer pack

Administration:

The wound should first be cleaned and dried if possible. Then puff the Wound Powder liberally over the infected area daily until the wound heals. Do not bandage powdered wounds.
